Quality Engineering Manager | Test Automation Leader | AI-Assisted Quality Engineering

Professional Summary & Leadership Highlights

- Quality Engineering Leader with 18+ years of IT experience and 9+ years in Test Automation, specializing in Playwright, Cypress, Selenium, CI/CD, API Testing, and AI-Assisted Quality Engineering. Proven track record of leading QA teams, defining quality strategies, building scalable automation frameworks, and driving continuous testing initiatives across enterprise applications.
- Experienced in driving delivery excellence and quality transformation in enterprise environments. Proven expertise in managing cross-functional teams, implementing process improvements, and leveraging Agile and SAFe frameworks to enhance delivery efficiency and stakeholder satisfaction. Skilled in risk management, governance, and data-driven decision making, with a strong focus on client engagement, business transformation and delivering measurable business outcomes through strategic planning and execution..
- Managed and mentored QA teams of up to 8 engineers across enterprise applications.
- Hands-on experience with OpenAI APIs, RAG Validation Frameworks, DeepEval, ChromaDB, and AI-driven test generation, enabling faster feedback cycles, improved defect detection, and enhanced software quality.

Core Competencies

- Quality Engineering Leadership
- Stakeholder Management
- Test Strategy & Governance
- Team Leadership & Mentoring
- Automation Framework Design
- Quality Transformation
- CI/CD Quality Engineering
- Agile Delivery & SAFe

Technical Skills

Automation: Playwright, Cypress, Selenium
Programming: Java, JavaScript, python
API Testing: Postman, SOAP UI, REST APIs
CI/CD & DevOps: GitHub Actions, Jenkins
Tools: Applitools, LambdaTest, Git
Databases: Oracle, SQL Server

AI-Assisted Quality Engineering

AI-Powered Test Case & Playwright Automation Generator

- Built AI-powered frameworks for generating structured test cases and Playwright automation scripts using OpenAI APIs and LLMs.
 - Developed intelligent QA workflows for edge-case generation, AI-driven failure analysis, probable root-cause identification, fix recommendations, and defect-resolution guidance.
- Github : <https://github.com/MdMohsin1985/mohsinPlaywrightFramework>

RAG Testing & Evaluation Framework

- Designed and implemented an AI-powered RAG testing framework using Python, OpenAI, ChromaDB, and DeepEval to validate retrieval quality, answer correctness, relevancy,

faithfulness, bias & fairness, knowledge boundaries, prompt injection resistance, and query robustness.

- Built automated dataset-driven evaluation and reporting for RAG applications, gaining hands-on experience in semantic retrieval, embeddings, responsible AI testing, LLM evaluation, and AI security testing. Github : <https://github.com/MdMohsin1985/mohsin-rag-testing-framework>

Professional Experience

- **Conde Nast India Pvt Ltd**

Associate QA Manager / QA Technical Lead | Jun 2022 – Apr 2026

- Managed and mentored an 8-member Quality Engineering team supporting subscription and commerce platforms increasing automation coverage from 40% to 75% and reducing regression effort by 60%.
- Defined test strategy, release readiness, automation roadmap, and quality governance practices across multiple business-critical applications.
- Designed scalable Cypress and Playwright frameworks covering 500+ automated test scenarios, reducing manual regression effort by approximately 70%.
- Established CI/CD-driven continuous testing pipelines using GitHub Actions, reducing regression execution time from 2 days to 4 hours.
- Implemented visual testing and automated reporting, enabling early detection of UI defects and reducing production visual issues
- Collaborated with Product Owners, Engineering Managers, and business stakeholders to drive quality improvements, risk mitigation, and production stability.
- Led adoption of AI-assisted quality engineering practices, including automated test generation, intelligent failure analysis, and RAG evaluation frameworks.

- **NTT Data**

QA Technical Lead | Oct 2021 – Jun 2022

- Developed and maintained Selenium WebDriver + Cucumber automation framework for the MEAD application supporting CSX Transportation.
- Collaborated with stakeholders and development teams to analyse requirements and design scalable automation solutions.
- Contributed to test strategy, automation planning, defect analysis, and release validation activities.

- **Wipro Limited**

Senior QA Engineer | Dec 2017 – Oct 2021

- Built Selenium WebDriver (JBehave) automation solutions and API testing workflows using SOAP UI.
- Contributed to EMV 3-D Secure (DS 2.0) authentication platform testing for secure web and mobile payment transactions.
- Supported Agile delivery teams through continuous testing, defect management, regression validation, and release support.

- Collaborated with cross-functional teams to improve test coverage and release quality.

- **InterGlobe Technologies**

Senior Software Engineer | May 2015 – July 2017

- Developed and maintained Selenium WebDriver automation solutions for hospitality domain applications.
- Automated critical booking and property management workflows, improving regression efficiency and test coverage.
- Performed functional testing, defect reporting, and release validation activities.

- **Mphasis**

Senior Software Engineer | June 2008 – May 2015

- Worked as an Assembler Programmer supporting airline industry applications for United Airlines and US Airways.
- Participated in application maintenance, enhancements, testing, and production support activities.

Education

Master of Computer Applications (MCA)

Sri Vidyaniketan Engineering College

JNT University, Tirupati

2005 – 2008
